

What to Expect When Coming to the  
Lab for Custom Tooth Shading &  
Custom Tooth Staining

Appointments are with Stacie Monday-Thursday from 9am -4 pm

Please call 800.924.6025 to make an appointment.

**Tooth Shading:**

Patients need to call the number above to make a 15 minute appointment with Stacie. Using the Vita Easyshade, the technician will read the adjacent tooth's shade and take photos for shade reference which will give our technicians a blue print of the patient's natural tooth and give their crown a natural look.

**Custom Staining:**

Patients need to call and make a one hour appointment. The technician will stain the crown with a palate of colors; it will be baked in an oven at 1700 degrees and then cooled. We will then send the crown back to the office with the patient for permanent cementation.

**\*\*If patients are bleaching, they should wait a minimum of one week after completing the bleaching process to receive an accurate shade\*\***
